LifeWear

This is LifeWear

Who you are, what you believe in: that's what you wear everyday. And that is what we make clothing for. Welcome to a new way of apparel.

Apparel that comes from our Japanese values of simplicity, quality and longevity. Designed to be of the time and for the time. Made with such modern elegance that it becomes the building blocks of your style.

A perfect shirt that is always being made more perfect. The simplest design hiding the most thoughtful and modern details. The best in fit and fabric made to be affordable and accessible to all.

Clothing that we are constantly innovating, bringing more warmth, more lightness, better design, and better comfort to your life.

It never stops evolving because your life never stops changing.

Simple apparel with a not-so-simple purpose: to make your life better.

UNIQLO LifeWear. Simple made better.

LifeWear

QUALITY AND MATERIAL

Clothing designed with a commitment to quality and superior fabric.

Our 100% natural wool knits are a perfect example of our commitment to quality and fabric, which determine texture and warmth.

INNOVATION

Clothing that continues to evolve.

Fusing today's trends with the latest technologies, we continuously improve our clothing, from classic pieces to the latest items.

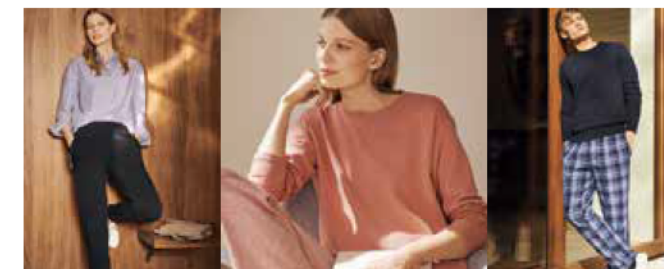

UTILITY

Clothing offering utility that's also packed with innovation.

We want to support your lifestyle by making it more comfortable and convenient. That's why we pack our clothing with innovation that shines in a range of settings.

COMFORT

Clothing that keeps you comfortable every day.

We don't just keep you looking or feeling good in your clothes. UNIQLO offers both stylish designs and total comfort.

HEATTECH

Generates heat from your body.

HEATTECH, innerwear designed to convert body moisture into heat. We commit to innovate and improve these products with each year.

HEATTECH

This innerwear generates heat from your body.

What is HEATTECH?

HEATTECH is innerwear made with a revolutionary heat-retaining fabric developed in Japan. The ground-breaking innerwear fundamentally overturns the conventionally accepted notion about winter that "when it's cold, you bundle up in heavy layers."

Moisture absorption and diffusion to keep you dry

In addition to retaining heat, HEATTECH absorbs and diffuses moisture. Among the combination of different fibres is a heavy dose of highly moisture-absorbing strands to keep the insides of your clothes drier indoors, on the train, and everywhere else.

*Functions vary depending on the product. Please check the back of packaging for more details.

Warm because the fabric absorbs moisture

The vapour transpired by the body is absorbed by highly moisture absorbent rayon fabric that retains the heat converted from the body's moisture. Highly stretchable for moving comfort is yet another reason to wear these.

Ultra-fine fabric keeps the warmth going

The trick to making a person feel warm is to keep the hot air from escaping. HEATTECH uses special fibres that's only one-tenth the width of a human hair. With those fibres, we make numerous layers of effective insulation that envelop and trap the hot air to achieve fantastic heat retention.

Three kinds of HEATTECH

Choose from 3 levels of warmth

Made of different fabrics in different thicknesses, the three types of HEATTECH offer varying levels of warmth. Tops and leggings for use as innerwear are available in all three types, so stock up on the HEATTECH that offers the best warmth for wherever you are.

HEATTECH

Thin yet warm.
Layer stylishly without bulking.

**HEATTECH
EXTRA WARM**

A brushed lining provides 1.5 times the warmth of the original HEATTECH

**HEATTECH
ULTRA WARM**

2.25 times warmer than the original. The warmest in HEATTECH history.

*Calculated based on the CLO value that measures heat maintenance. Compared to regular HEATTECH.

AIRism Bringing you ultimate comfort.

AIRism reduces stuffiness to protect the skin from the stress of large temperature swings and helps keep you comfortable.

What is AIRism?

AIRism responds to what's happening underneath your clothes, be it sticky perspiration, or moisture from changes in temperature. By helping your skin breathe, AIRism reduces dampness on your body and keeps your skin smooth and dry.

Women's AIRism uses fabric with excellent moisture absorption and evaporating properties

A gradual sweat can easily make you feel damp and cold, so we use cupra fibres extracted from plants. They simultaneously absorb and diffuse sweat to adjust the moisture under your clothes and keep you from feeling uncomfortable and cold, thus eliminating discomfort from temperature changes.

Men's AIRism with moisture-wicking and fast-drying properties

AIRism for men, who tend to perspire more, uses polyester micro-fibres that absorb and dry perspiration fast. The fine, silk-like fibres feel soothing while quickly eliminating sweat.
